Date	18 February 2026
Team ID	LTVIP2026TMIDS65702
Project Name	Online Payments Fraud Detection using Machine Learning
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.

- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.

- Define features, development phases, and solution requirements.

- Provide specifications according to which the solution is defined, managed, and delivered.
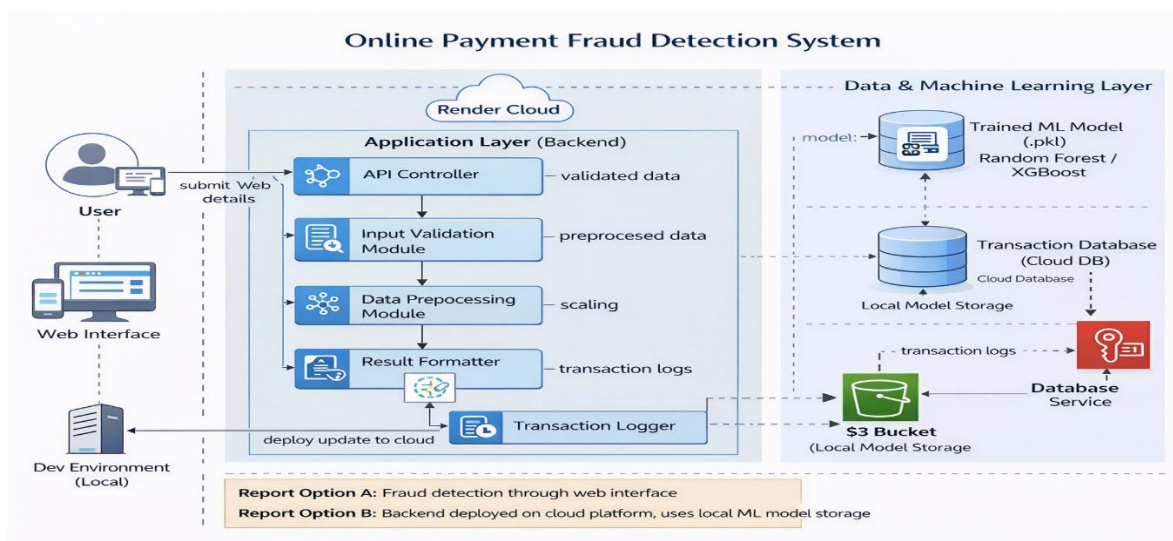

Example - Solution Architecture Diagram:

Figure 1: Architecture and data flow of the Online Payments Fraud Detection Using ML
